

I was unable to attend yesterday's hearing, but want to urge the committee to put a complete ban on assault weapons, ban high capacity ammunition magazines, and require universal background checks on all gun sales.

We and our children are no longer safe as was shockingly evident in Newtown, and it's about time our legislators did something to make our lives safer.

Inaction by our legislators on gun control is irresponsible and reckless. The nation is watching CT closely, and we need to be a leader.

How many more children need to be slaughtered before you take action?

If NY can do it, why can't CT? What is wrong with our legislators?
