

Dear committee members,

We regulate cars, safety standards of hazardous materials at work; we put flame retardant in clothes. This country is all about safety. Only gun owners and numbers of guns allowed and types of weapons allowed are unregulated. We all know why. The people pushing for no regulations have money power and a criminal mindset. They have no regard even for babies in their nefarious push for power. Why is the pursuit of life and happiness trumped by the 2nd amendment? All freedoms need to be balanced in a common sense way with no one dominating all of our other freedoms. Please act in the public safety. Statistics speak for themselves, Sincerely,

Stina Reed
