AN ACT CONCERNING THE DAM SAFETY PROGRAM.

Be it enacted by the Senate and House of Representatives in General Assembly convened:

Section 1. Section 22a-401 of the general statutes is repealed and the following is substituted in lieu thereof (Effective October 1, 2013):

All dams, dikes, reservoirs and other similar structures, with their appurtenances, without exception and without further definition or enumeration herein, which, by breaking away or otherwise, might endanger life or property, shall be subject to the jurisdiction conferred by this chapter. The Commissioner of Energy and Environmental Protection shall formulate all rules, definitions and regulations necessary to carry out the provisions of this chapter and not inconsistent therewith. The commissioner or his authorized representatives may enter upon private property to make such investigations and gather such data concerning dams, watersheds, sites, structures and general conditions as may be necessary in the public interest for a proper inspection, review and study of the design and construction of such structures and of the environmental impact of such structures on the inland wetlands of the state. The commissioner may, when necessary, employ or make such agreements with geologists, other engineers, expert consultants and such assistants as may be reasonably necessary to carry out the provisions of this chapter. [The owner of any dam, dike or similar structure under the
jurisdiction conferred by this chapter shall notify the commissioner, by
registered or certified mail return receipt requested, of the transfer of
ownership of any such dam, dike or similar structure not later than ten
days after the date of such transfer.]

Sec. 2. Subsection (b) of section 22a-403 of the general statutes is
repealed and the following is substituted in lieu thereof (Effective
October 1, 2013):

(b) The commissioner or his representative, engineer or consultant
shall determine the impact of the construction work on the
environment, on the safety of persons and property and on the tidal
wetlands and inland wetlands and watercourses of the state in
accordance with the provisions of sections [22a-36] 22a-28 to 22a-45,
inclusive, and shall further determine the need for a fishway in
accordance with the provisions of section 26-136, and shall examine the
documents and inspect the site, and, upon approval thereof, the
commissioner shall issue a permit authorizing the proposed
construction work under such conditions as the commissioner may
direct. The commissioner shall send a copy of the permit to the town
clerk in any municipality in which the structure is located or any
municipality which will be affected by the structure. An applicant for a
permit issued under this section to alter, rebuild, repair or remove an
existing dam shall not be required to obtain a permit under sections
[22a-36] 22a-28 to 22a-45a, inclusive, or section 22a-342, 22a-361 or 22a-
368. An applicant for a permit issued under this section to construct a
new dam shall not be required to obtain a permit under sections [22a-
36] 22a-28 to 22a-45a, inclusive, for such construction. An applicant for
a dam safety permit shall not be required to obtain approval of a
certification under section 25-68d.

Sec. 3. Section 22a-404 of the general statutes is repealed and the
following is substituted in lieu thereof (Effective October 1, 2013):

The [commissioner or his representative] dam owner or his or her
representative supervising the work on any dam or other like structure
subject to the commissioner's jurisdiction pursuant to this chapter shall [inspect the work or cause it] cause the work to be inspected by a registered professional engineer licensed in the state to the extent necessary to determine whether the structure will be safe and secure. [The] For a high or significant hazard dam, or if the commissioner determines a sensitive ecological condition exists, the commissioner may [, when in his judgment circumstances warrant,] place a competent inspector on the work, and the compensation for such inspector shall be shared equally by the state and by the owner. When the work has been completed to the satisfaction of the commissioner, the owner shall file with the commissioner plans and descriptions of the work as actually constructed, together with any other pertinent data. Not later than thirty days after the date the work is completed, the dam owner shall submit to the commissioner a sworn statement from the engineer who completed such inspection. Such sworn statement shall (1) attest that such engineer inspected the work and determined the dam or like structure to be safe within the parameters of the design of such dam or like structure, (2) attest that all appurtenances to such dam or like structure were built, repaired, altered or removed in conformance with plans, specifications and drawings approved by the commissioner pursuant to a permit for construction or an order issued pursuant to section 22a-402, and (3) bear the engineer's professional seal.

Sec. 4. Section 22a-409 of the general statutes is repealed and the following is substituted in lieu thereof (Effective October 1, 2013):

(a) The commissioner shall cause a survey and maps to be made of each town showing the location of any dams or similar structures within such town, and shall file a copy of such map with the town clerk. On and after October 1, 2007, the owner of real property where a high hazard or significant hazard dam is located shall cause to be recorded on the land records in the municipality where the property is located a document that identifies the existence of the dam and whether the dam is categorized as a high hazard dam or a significant

LCO
hazard dam. The commissioner shall publish a standardized form to
be used for such purposes.

(b) The owner of any dam or similar structure not already registered
shall register on or before [July 1, 1984] October 1, 2015, with the
Commissioner of Energy and Environmental Protection on a form
prescribed by [him] the commissioner, the location and dimensions of
such dam or structure and such other information as the commissioner
may require. The fee for registration shall be as follows: (1) Dams or
similar structures five feet or more in height but less than fifteen feet,
fifty dollars; (2) dams or similar structures fifteen feet or more in
height but less than twenty-five feet, one hundred dollars; and (3)
dams or similar structures twenty-five feet or more in height, two
hundred dollars. Dams or similar structures less than five feet in
height shall be registered without fee. As used in this subsection,
"height" means the vertical distance from the crest of a dam or similar
structure to the downstream toe of such dam or similar structure. The
owner of any dam or similar structure shall notify the commissioner
by registered or certified mail, return receipt requested, of a transfer of
ownership of such dam or similar structure not later than ten days
after the date of such transfer.

(c) The owner of any dam or similar structure registered pursuant to
subsection (b) of this section shall cause such structure to be inspected
in accordance with regulations adopted pursuant to this subsection by
a registered professional engineer licensed in the state and shall submit
the results of such inspection to the commissioner on a form prescribed
by the commissioner. The commissioner shall periodically inspect
dams registered pursuant to subsection (b) of this section for quality
assurance when an owner fails to undertake a regularly scheduled
inspection and as necessary after a flood event. The fee for any such
inspection shall be six hundred sixty dollars until such time as
regulations are adopted concerning such inspection fees. Any dam
which impounds less than three acre-feet of water or any dam which
the commissioner finds has a potential for negligible damage in the
event of a failure, after an initial inspection, shall be exempt from the
provisions of this subsection except upon determination by the
commissioner that such dam poses a unique hazard. The
commissioner shall adopt regulations in accordance with the
provisions of chapter 54 establishing (1) a schedule for the frequency of
and procedures for inspection of dams, (2) the inspection fees for
[regularly scheduled] inspections undertaken by the department,
sufficient to cover the reasonable cost of such inspections, (3)
procedures for registration and criteria for waiver of registration and
inspection fees, and (4) criteria for determining whether a dam has a
potential for negligible damage in the event of a failure.

(d) The commissioner may audit any inspection report submitted
pursuant to this section by the owner of a dam or similar structure.
When conducting such audit, the commissioner may request, in
writing, any information the commissioner deems necessary to carry
out such audit, including additional information or field inspections. If
the commissioner determines that the inspection report is materially
inaccurate, incomplete or misleading, the commissioner may require
that another inspection be independently undertaken by a
disinterested registered professional engineer licensed in the state. For
purposes of this subsection, "disinterested" means that such engineer
(1) does not have any financial interest, other than the expectation of
reasonable compensation for his or her services, (2) did not engage in
any activities associated with the development or preparation of the
inspection being audited, and (3) is not under the same employ as the
owner of the dam or similar structure or the engineer who performed
the inspection that is being audited. Such independent inspection shall
be performed at the expense of the owner of the dam or similar
structure. The commissioner shall adopt regulations in accordance
with the provisions of chapter 54 to establish the manner in which the
owner of the dam or similar structure: (A) Shall receive notice of such
independent inspection, and (B) may appeal the cost of such
independent inspection.
Sec. 5. (NEW) (Effective October 1, 2013) After the Commissioner of Energy and Environmental Protection's adoption of regulations pursuant to this section, the owner of any high or significant hazard dam or similar structure shall develop and implement an emergency action plan. The emergency action plan shall be updated every two years and copies shall be filed with the Commissioner of Energy and Environmental Protection and the chief executive officer of any municipality that would potentially be affected in the event of an emergency. The Commissioner of Energy and Environmental Protection shall adopt regulations, in accordance with the provisions of chapter 54 of the general statutes, establishing the requirements for such emergency action plans, including, but not limited to, (1) criteria and standards for inundation studies and inundation zone mapping; (2) procedures for monitoring the dam or structure during periods of heavy rainfall and runoff, including personnel assignments and features of the dam to be inspected at given intervals during such periods; and (3) a formal notification system to alert appropriate local officials who are responsible for the warning and evacuation of residents in the inundation zone in the event of an emergency.

Sec. 6. Section 22a-411 of the general statutes is repealed and the following is substituted in lieu thereof (Effective October 1, 2013):

(a) The commissioner may issue a general permit for any minor activity regulated under sections 22a-401 to 22a-410, inclusive, as amended by this act, except for any activity covered by an individual permit, if the commissioner determines that such activity would cause minimal environmental effects when conducted separately and would cause only minimal cumulative environmental effects. Such activities may include routine maintenance and routine repair of any dam, dike, reservoir or other similar structure or the removal of any dam to improve fish passage or to provide other ecological benefits. Any person conducting an activity for which a general permit has been issued shall not be required to obtain an individual permit under sections 22a-36 to 22a-45a, inclusive, or section 22a-342, 22a-368 or 22a-
403, as amended by this act, except as provided in subsection (c) of this
section. A general permit shall clearly define the activity covered
thereby and may include such conditions and requirements as the
commissioner deems appropriate, including, but not limited to,
management practices and verification and reporting requirements.
The general permit may require any person conducting any activity
under the general permit to report, on a form prescribed by the
commissioner, such activity to the commissioner before it shall be
covered by the general permit. The commissioner shall prepare, and
shall annually amend, a list of holders of general permits under this
section, which list shall be made available to the public.

(b) Notwithstanding any other procedures specified in [said]
sections 22a-401 to 22a-410, inclusive, as amended by this act, any
regulation adopted thereunder, and chapter 54, the commissioner may
issue, revoke, suspend or modify a general permit in accordance with
the following procedures: (1) The commissioner shall publish in a
newspaper having a substantial circulation in the affected area or areas
notice of intent to issue a general permit; (2) the commissioner shall
allow a comment period of thirty days following publication of such
notice during which interested persons may submit written comments
to the commissioner and the commissioner shall hold a public hearing
if, within said comment period, he receives a petition signed by at least
twenty-five persons; (3) the commissioner may not issue the general
permit until after the comment period; and (4) the commissioner shall
publish notice of any issued permit in a newspaper having substantial
circulation in the affected area or areas. Any person may request that
the commissioner issue, modify or revoke a general permit in
accordance with the provisions of this subsection.

(c) Subsequent to the issuance of a general permit, the commissioner
may require any person to obtain an individual permit under the
provisions of [said] sections 22a-401 to 22a-410, inclusive, as amended
by this act, for all or any portion of the activities covered by the general
permit, if in the commissioner's judgment the purposes and policies of
said sections would be best served by requiring an application for an individual permit. The commissioner may require an individual permit under this subsection only if the affected person has been notified in writing that an individual permit is required. The notice shall include a brief statement of the reasons for the decision and a statement that upon the date of issuance of such notice the general permit as it applies to the individual activity will terminate.

(d) Any general permit issued under this section may require that any person intending to conduct an activity covered by such general permit give written notice of such intention to the inland wetlands agency, zoning commission, planning commission or combined planning and zoning commission, and conservation commission of any municipality which will or may be affected by such activity, and to the department which shall make such notices available to the public. The general permit shall specify the information which must be contained in the notice. [An inland wetlands agency, planning and zoning commission, conservation commission or any person may submit written comments to the commissioner concerning such activity no later than twenty-five days before the date that the activity is proposed to begin.]

(e) The commissioner may adopt regulations in accordance with the provisions of chapter 54 to carry out the purposes of this section.

This act shall take effect as follows and shall amend the following sections:
