Subject: IN SUPPORT OF HB 5127

Ladies and Gentlemen,

Although I am not a New Haven rail line commuter, I still know right from wrong. I fully support the logic of proposed HB 5127 which says that if train service is cancelled for more than 48 hours, ticket validity must be extended. An excellent example is last weekends' severe snow storm which has curtailed train service for multiple days in many locations throughout Connecticut. There is no logical reason why the commuter should be penalized for not being able to use a service that does not exist!
