Subject: testimony from gregg marchand

I Gregg Marchand from Willimantic oppose Proposed H.B. No. 5554 AN ACT ENABLING CERTAIN MUNICIPALITIES TO INSTALL TRAFFIC SIGNAL ENFORCEMENT CAMERAS. On the grounds the cameras could possibly be manipulated. For example a vehicle belonging to Joe was photographed going through a red light I was behind him. Joe had the violation but I got the ticket. With the technology today photographs could be easily manipulated possibly showing me going through the red light instead of the real violator. By using the simple computer task of copying then pasting the photos switching the pictures around. It also seems this cannot be ethically prosecuted because of not having a human as a witness. This is not true justice. Without having a human witness this will breed kangaroo courts. It may be a Fourth Amendment violation too I am appalled of this idea. This is supposed to be a free country not a country where the citizens get spied on by the government then prosecuted without a human as a witness.
