Dear Commissioners,

I recommend you for taking this seemingly small step which I believe will have an on going beneficial effect for generations to come. The effect on impressionable young minds seeing signs continualng announcing the presence of men working as opposed to women do nothing can not be measured, but anything that engenders inequality can only have detrimental effects.

We have three major religions that place women in institutionally second position.

We have inequality in pay.

So while the transportation committee can not solve all problems, they can begin by making gender neutral signs the norm.

Thank you for making this change

John w glynn
