Subject: Testimony on Bill #6050

To: Transportation Committee

How will a toll on Connecticut borders protect my friends and businesses in Sandy Hook from further harm? The more hostile the State of Connecticut becomes in financially raping the truly private sector the more costly it becomes for decent citizens to live in CT.

Border tolls will certainly escalate the ongoing friction between the blue States of NY and CT, detrimental to both States -- have you noticed the number of residents and businesses moving from NY & CT to the red State of Texas which has no income tax, no toll roads and lower unemployment?

I certainly don't want to be the last conservative (tax provider) doing business in CT and having to pay for all the tax consumers on the government payroll. I suggest you try a unique solution --- cut spending. Need help? Call me (Heuristic problem solver) at 203 746-0223
