

March 4, 2013

Hello my name is Dominic Onofrio I am 13 years old, from Hamden Ct. and I am in the 8th grade. I think that undocumented immigrants should be able to get a driven license and car insurance because it is not only right but safe. Everyone that is legal has both of them, so why can't immigrants have one, we all be protected.

Say someone in your family got into a car accident against an individual with not insurance and ended up in a hospital, the monetary expenses would be by the thousands, not only that the insurance would go after the person with the insurance but the amount to pay to the insurance policy would go up too., not matter who's foul that accident was.

I know that if my mom got into a bad car accident I would want to make she is taken care at the hospital and I would not want her insurance prices to go up because the other person wasn't able to get insurance even if he wanted to.

I believe that if everyone had the opportunity to get a driver's license they would pay to have car insurance and it would make everyone on the road safe and protected, and people would pay less money every month for their premiums.

Thank you.....
