

PLEASE do not vote your approval of this bill. The cruelty of bow hunting is seen when too many animals hit by an arrow die a slow death or are crippled due to the inaccuracy of the bow hunter. And this is called a "SPORT"? It adds new meaning to that word.

I also live up against woodland where gun shots are a daily occurrence. To know that a Sunday's walk with my dogs in the woods would be dangerous is a bit overwhelming. So often we hear the words "if we can just save one life" when a particularly advocated bill is going through. This is one of those times I send this message to you and ask that you reject this bill.

Sadly, very little was published about this awful bill being resurrected. I just happened to be at the legislative building yesterday on another matter and learned that it was in committee. I am a voter and will be watching closely as to who cares more for the hunter (who already has 6 days to hunt in the week) versus the hiker, biker, runner, bird watcher, casual walker-in other words 99% of the citizens of CT.
