

#5299 Gould 2/20/13

To facilitate prompt medicinal response to an epileptic seizure to certain children attending public and nonpublic schools in the event that a qualified school nurse is not present to administer the required medication in a timely manner by authorizing a trained unlicensed surrogate to administer the medication.

If passed, this important bill will protect many children from further disability or even death. Please vote yes and know that by doing so, you each will help those prone to seizures as well as relieve the tremendous stress parents face each day as they send their children off to school, not knowing if they will return home at the end of the day, if stricken and not treated in a timely fashion.

Sincerely,

Ellen and Richard Gould
