

HB 6005

To Whom It May Concern:

My son Todd Turcotte is a resident at The Hartford Regional Center . He is a 44 year old Down Syndrome, diabetic, (4 injections a day), legally blind, with multi-medical issues. He also has behavior problems. The staff at this center give him excellent care and address all his behavior issues with care and great skill. He is very happy there and it is so important for him to be with this highly qualified staff. They are his family and it would be very disruptive emotionally to move him.

Sincerely,

Dorothy Fish
