

**Hill HB 6519**

I am writing as a concerned citizen of Connecticut urging you to support HB6519 and HB6527. As a mother, gardener and human being I believe we all have the right to know what is put into our food system. It seems absurd that our government enforces the labeling of trans fat and hydrogenated oils, yet it has issues with labeling something that has clearly not been studied enough. We are not lab rats and deserve the right to know what we eat and more importantly what our children eat! Please support this bill.

Thank You,  
Mary Hill  
Voluntown, CT
