

HB 6521

As someone who has been a medical director of a hospice, and likely the longest certified hospice and palliative care physician in CT, I would like to strongly support Paul Dragger, JD's work in getting MOLST/POLST on the legislative agenda (Bill No. 6521). This type of bill will make sure that patient's wishes for life-sustaining treatments will be able to cross different health care settings without unduly burdening patients or their care givers. Congratulations Paul Drager, JD. Ed Hargus, MD
