Re: 6590

I SUPPORT BILL NUMBER 6590 BECAUSE

- 1- Tattoo artists are using needles to puncture the skin, something heretofore reserved for licensed professionals, i.e., physicians, nurses, and others in the medical field.
- 2- Licenses are issued for occupations as benign as barbers, glass installers, court reporters, and interior designers.
- 3- The failure of a tattoo artist to be scrupulously sanitary can have devastating effects on the person tattooed.
- 4- We require people in any occupation where food is served to thoroughly wash their hands after using a bathroom facility, because we are aware that deadly infections can occur if that is not complied with.

I believe a bill such as this should be passed because of the many reasons you have heard.

Very truly yours,

Walter Rochow
