

HB 6592

Good morning Representative Johnson, Senator Gerratono and distinguished members of the Public Health Committee.

I am a resident of Connecticut as is a close relative of mine. My concern is that a Connecticut law, which dates back to 1893, is preventing this close relative of mine from being able to practice classical homeopath in CT. I have seen her through the years make a significant commitment both financially and academically to attain the knowledge she has in the homeopath profession. I would hate to see her and other like her have to leave the state to continue with the work they have started. More and more people are becoming interested in this area, and we need professional, serious minded and committed homeopaths to turn to. Your support of Bill #6592 to certify Classical Homeopaths is a positive step appreciated by your constituents.

Respectfully and appreciatively submitted,

Patricia Browning

Derby, CT
