

**HB 6645**

**I am not in favor of the referenced Bill.** Why is this Bill even being considered in the CT legislature at this time? In my family, when we have a member who has a protracted illness, it is handled by the individual, their doctor and any will or legal document the person has, with loving support from their family members and the surrounding community.

Why the State of CT is compelled to become judge and jury with a Bill is beyond my comprehension. Especially when only 2 other States have enacted one and those laws were spearhead by the same outside special interest group that has an agenda.

I also worry about the most vulnerable in our state as the result of this Bill, the elderly and the disabled, who will be regarded only as a burden on a system and not receive the proper compassion and care they deserve. **Please stop this Bill in its tracks!!**
