

HB 6645

To my legislators:

Yes, please pass this bill and make it a law to legalize doctors to help terminally ill patients to die peacefully. Please do not allow the religious groups to dictate for all of us. And please make the parameters clear, so that unethical doctors cannot get away with "taking lives for money" or selling said pharmaceuticals on the black market. Will you require that state or private insurances pay for euthanasia? If it is a matter of funding, I'm sure it will cost less to assist a merciful suicide, than to keep some one alive and suffering for months or even years. How will you handle cases of dying minors? What about those suffering from mental illness or depression? I raise these questions because they WILL become part of the conversation, controversy and decision. Your thoughtful consideration is appreciated. I hope you will respect the rights of individual citizens and give them the legal right to choose how they will die.

Thank you,

Kelly Bradway
