

Patricia Cyr

HB 6645

I am in support of an end of life choice. My competent father-in-law suffered immensely for two years, and how much more humane it would have been if we could have peacefully put an end to his needless suffering. I've also watched a friend suffer with brain cancer who endured much pain until his death. People seem to think nothing of putting pets to sleep; they are allowed planned compassionate deaths. In this regard, we treat our pets better than our loved ones. I sincerely hope that the hearing in Room 1D on March 20th gives support to death with dignity.
