

HB 6645

I approve and encourage passage of Bill 6645. When a person has a terminal illness and is facing a long and sometimes painful stretch of deteriorating health, who are we to prolong their agony? Choose compassion for the terminally ill who have no more quality of life to look forward to. Choose Bill 6645 so the terminally ill can choose for themselves when to exit with dignity. It's the right thing to do.
