

H.B. No. 6645

AN ACT CONCERNING COMPASSIONATE AID IN DYING FOR TERMINALLY ILL PATIENTS.

Dear Senators and Representatives,

I'm urging you to vote NO on H.B. 6645 and any similar legislation on assisted suicide or assisted death. It's imperative to stop this medical and psychological madness now!

The mere fact that this horrific legislation is being considered provides evidence that the brainwashing process has begun in our State Legislature. To simply call it compassionate aid is unconscionable. To allow such would be an atrocity.

The further cover-up in the language of this bill is the word "terminally". This broad-based term is a vague expression that leaves room for excessive violations well-beyond thoughtful imagination.

Furthermore, this open-ended bill is nothing short of a cover for future ending-of-life measures. Eventually, every single person could be affected directly or indirectly by this legislation. Those targeted could later include individuals deemed onerous to society at all ages. Parents, children, and guardians would be coaxed into accepting ending of life measures for those under their care or close to them.

It is everyone's God-given duty to help the innocent to live, not to help them die. To do otherwise, in and out of government, is aiding and abetting criminal activity of which the most defenseless citizens are targeted. Plainly and simply put, this legislation represents incomprehensible evil activity against the weak and hurting.

I hope you take a strong look at the destructive ramifications that HB 6645 provides. It furthers a grotesque trend of devaluing individual-worth in our State. To promote any of such activity would be a terrifying injustice of immense proportions leading to acts of violence.

Since we are in the process of trying to prevent massacres here in Connecticut, I suggest reaffirming passionate care for the innocent so-called terminally ill patients, at all ages, who are valued assets to our society in ways we may not even see. As ridiculous as it may sound, it would make much more sense to give the death sentence to a terminally incarcerated criminal. After all, to aid in the death of an innocent individual is to participate in their sentence of death.

Sincerely,

Janet Roberts
Prospect, CT
