

Boyce SB368

To Whom It May Concern,

This email is to express my support for Bill No. S0368. We NEED public awareness and state support regarding Lyme Disease. I have a student and close friend who are both currently battling the daily effects of this disease. With better education, we would have been able to treat this disease MUCH sooner. I am emotionally struggling to watch these two people, who are very lively and active people, barely able to move and complete everyday activities due to the complications. I have also been a support system for the caregivers-it takes a HUGE toll on those taking care of someone with this disease-to see your child unable to function with vibrance and life is not something that should be happening.

PLEASE help those affected by Lyme Disease and their caregivers with educational awareness and some type of support system.

Please confirm receipt of this email.

Sincerely,

Carrie Boyce
