Subject: Public testimony against SB 374

SB 374 would create large added expenses for the State, invade privacy, cause inconvenience and heartache for families with few or negative results. The real problem is that society has rejected God and families have broken down as a result. Sex before marriage, immorality, adultery, drug use, alcohol, and the gay agenda have all worked to destroy the traditional family. We have two children, ages 17 and 18. We read the Bible together as a family every day and follow its teaching. We have zero problems with our children. They are happy and love to serve others. We don't need a government psychiatrist to tell us what we need to do. Psychiatrists have a much higher than average suicide rate. They don't have the answers. Jesus, Who teaches us to repent from sexual immorality, to be pure and holy, and to be self-sacrificing for others, has the answers.

Sincerely,

Mike and Pam Derewianka
