### DEPARTMENT OF ENERGY AND ENVIRONMENTAL PROTECTION

#### Notice of Intent to Amend a Section of the Air Quality Regulations and to Revise the State Implementation Plan

The Commissioner of the Department of Energy and Environmental Protection (DEEP) hereby gives notice of a public hearing as part of a proceeding to amend a state regulation concerning the abatement of air pollution. Upon adoption, the amended section will be submitted to the U.S. Environmental Protection Agency as a revision to the State Implementation Plan for air quality.

The proposal primarily enhances existing requirements concerned with the control of volatile organic compound (VOC) emissions from large aboveground storage tanks through revisions to section 22a-174-20 of the Regulations of Connecticut State Agencies. DEEP is proposing to:

- remove the option of using an undomed floating roof tank to store VOCs, clarify inspection requirements and add requirements for roof landing events and degassing and cleaning operations;
- require timely repair of leaks throughout the VOC storage and transfer facility;
- revise the floating roof requirements for VOC and water separators to be consistent with the floating roof requirements for storage tanks; and
- revise the leak control provisions for synthetic organic chemical and polymer manufacturing equipment by removing an outdated regulatory reference and clarifying the time limit for retesting.

All interested persons are invited to comment on the proposal. Comments should be submitted no later than 8 March 2013 to Robin D. Baena, DEEP, Bureau of Air Management, Engineering & Enforcement, 79 Elm Street, Hartford, Connecticut 06106-5127. Comments may be submitted by post, facsimile to (860) 424-4064 or by electronic mail to [robin.baena@ct.gov](mailto:robin.baena@ct.gov).

In addition to accepting written comments, DEEP will also hold the public hearing described below. Any person giving oral comment at the hearing will be asked to submit a written copy of such comments.
