Please reject the new ABI waiver II

I am fully against the new ABI waiver II for many reasons that have already been brought to your attention. I am a worker for brain injured survivors and I am a very qualified and educated individual. If the new ABI waiver II is approved, it will be detrimental to the brain injured survivors as well as the qualified staff that provide services to these individuals. These individuals are human beings, not dollar signs. Although I have a graduate degree, I've continued to work with brain injured survivors for the past 10 years because I love what I do and I love making a difference in their lives. Brain injured survivors need specialized care from individuals who understand the condition. Not only am I a brain injury worker, I am also their friend. Please allow me to ask you a question to put things into perspective.....Being that brain injuries are a growing epidemic, wouldn't you want the best for your loved one and fight for the best care possible? If your answer is yes, then the new ABI Waiver is NOT the answer.

Sincerely,

Aimee Millett
