

To whom it may concern

In the last couple of years I have heard about Common Core for our children in school . This is a flawed system ! Just on the math skills I have never seen how one person can come up with an answer of 33 by adding lines of numbers then adding other numbers to get an answer . What kind of math is that ? Yes our kids need to catch up to the rest of the world when it comes to education but Common core is not the answer ! Lets get our kids back to basics and give the teachers what they need to do this . Get parents more involved then you will see the kids learning more. I want my son to succeed but Common Core is not the answer !

Thanks for your time sincerely Thomas Donston
