

Hello,

I am a mother of a third grader in Watertown, CT. I am unable to be present at the hearing today that is discussing the Common Core issues.

I strongly urge all who are in the decision making process on these common core issues to really take a look at the curriculum. As a parent helping my daughter with homework on a daily basis. I can see how detrimental this common core is to my daughters education and Learning.

Please take the time to listen and validate all concerned parents and educators on this matter.

Sincerely,

Melissa Chalker
