

Members of the Joint Committee on Environment:

I support H.B. 5080 an act authorizing bow and arrow hunting on Sundays. As an avid and responsible hunter for many years I feel the bill would allow for the safe harvesting of these animals that have become such a problem. Archery hunters have additional hunter training beyond that of those that use firearms and much of that state required training has to do with safety. I believe restricting this to private land would strike a fair balance for those that enjoy the outdoors. I thank you for your consideration on this matter.

Respectfully,
John Fernandes
