

To the Environment Committee,

As a constituent of South Windsor, CT, I am writing in support of HB 5416 (Section 2) for the banning of gestation crates. In addition to a small, ethical improvement in the way we raise animals for food, I hope you consider this important legislation to protect family farmers from large-scale factory farms that could come to CT. Thank you for your time.

Sincerely,  
Jasmine Caruk
