

Dear Madam or Sir,

I am writing to express my support for proposed legislation of the Environment Committee, Raised Bill 70. I support this proposal for the following reasons: first, it is critical to classify all land under the custody or control of the State DEEP and DoAg as land of high conservation value. Secondly, it is essential it is clearly State policy that all land of high conservation value is preserved for its conservation and resource value in perpetuity. Finally, it is critical that all State land of high conservation value be required to have a conservation restriction in its deed to ensure the land is preserved solely for its conservation and resource purposes.

Also, it is imperative that all land of high conservation value include any land used for agricultural purposes.

Thank you for your time and consideration in this matter.

Regards,  
Rick Doran
