

Written Testimony Concerning Senate Bill 237 AN ACT PROHIBITING THE STORAGE OR DISPOSAL OF FRACKING WASTE IN CONNECTICUT.

Senator Meyer, Representative Gentile, and members of the committee, I thank you for the opportunity to testify in support of this legislation that would keep toxic and radioactive fracking waste out of Connecticut.

As a citizen of CT for many years, I am deeply concerned with the safety and quality of our water systems. Water is our most precious resource and it is vital that we all do what we can to protect it. It is a known fact that the chemicals used in used in fracking are toxic and have caused serious issues with drinking water near fracking sites and waste storage places. I know CT has worked very hard over the years to protect the Clean Air and Water Acts and I believe passing this bill is of equal importance. Thank you for standing up for us citizens!

Thank you for your consideration!
