Re: HB237 – Bill to Prevent Storage of Fracking Waste in CT.

Please vote in favor of HB237 to prevent the storage of fracking waste throughout Connecticut. This waste is extremely toxic, hazardous to both humans and to the environment, and cannot be mitigated by dilution. Some of it is radioactive! Some is cancer causing! Water is our most precious resource and must be protected. Personally, I think it is immoral for these gas companies to be fracking and to be making huge profits without first having the capability to make their wastes harmless to society and to the environment. Please protect Connecticut residents and vote to ban both fracking and the storage of all fracking wastes in Ct. Thank you very much.
