

Summary of true Eco management The use of pesticides as a solution to control pests is making us lose sight of the real business of being good care takers of the environment !! I suggest to set up a PESTICIDE FREE ZONE accredited program . Here people can be free to develop an art - science approach to work in balance with nature and learn a never ending partnership ! Nature perform on it's own for the health of this planet and our future generations . We must give it a chance and work to keep it all in BALANCE .pesticides should be managed by the state and allowed to be used by a FEW BIG BUSINESSES that are wiling to be heavily regulated by the state!! This is the only way we can SAVE THE ENVIRONMENT !!!
Sincerely.
