

To Whom It May Concern:

We wish to express our support of HB5308 which will establish regulations in the handling of fracking waste. There is no place in Connecticut for these highly toxic materials which cause cancer and endanger our environment.

Further, we support SB237 which would ban the storage and disposal of fracking waste in our state. We oppose helping other states to dispose of their dangerous fluids which are not produced in Connecticut.

HB5307 which would weaken regulations controlling the loading and unloading of oil and gas from ships in our harbors is a very bad idea. For many years great efforts to clean Long Island Sound waters have had a lot of success. This propose law would reverse those efforts.
