

To Whom It May Concern,

I am writing as a Connecticut citizen and ask that you consider not permitting fracking in this state. I urge you to consider waiting until further research is done and we have a better understanding of the environmental impact this process will have. CT has an opportunity to create and grow in many other ways – there are booming economies that are thriving around the country without fracking and we are and can be one of them.

You are placed in a difficult situation with this option but please know you have the support of this family in blocking fracking at this time.

Kind Regards,  
Lori L Cochran, Easton
