

Dear Members of the panel,

I am against Fracking in the first place, so I am certainly against transporting the waste here.

Why allow these carcinogenic and possibly radioactive toxins here?

Our fragile environment is already suffering from pollution in all its forms.

Please don't let monetary concerns subvert the instinct for preservation, that would be a huge injustice.

This is so important for our children's health and the environment and for the future.

I implore you to do the right thing.

Sincerely,

Mary Valencia
