

HB 5308
SB 237

As a Connecticut taxpayer, I ask you to do everything you can to *prohibit* the storage or disposal of fracking waste in our state.

Whatever the short-term "benefits", the long-term risks are just too great:

- Contaminated soil and water
- Health risks
- High-cost cleanups
- Reduction in property values

Connecticut already has plenty of problematic sites: [DEEP: State of CT Superfund Priority List](#) and we can't afford any more!

Thank you,
Stacy Prince
