

Dear Sirs;

I would like to see House Bill 5423 pass for the following reasons.

Any deep V hull boat will wander back and forth 6 mph. My 15 ft. deep V does this.

Deep V hull boats will have a bow up attitude at 6 mph. and make a large wake.

Gas mileage will be poor at that speed.

I launch at Windsor and transit Hartford. On hot summer days 30 min. transit time each way is very hot in a open boat at 6 mph. In my 12 ft. aluminum boat it's like a slo-cooker.

If I transit Hartford to fish in Wethersfield Cove it cuts down on fishing time.

I would like to see the speed limit go back to what it was before the 6 mph. limit.

Thank you for your consideration.
