

My husband and I support Raised Bill 70 because it is our open space that has made our state special. It helps keep our real estate prices good and will continue to do so if we protect our environment. Also, the wildlife that I see out my door and the clean water we drink is because we have done a great job so far. Do not go backwards. When I was a child here I never saw eagles but I see them all the time today. Pilated woodpeckers, bluebirds, Osprey, need a place to breed in peace.
