

WRITTEN TESTIMONY OF CHARLES W. MORGAN
BEFORE THE CONNECTICUT GEN. ASSEMBLY ENVIRONMENT
COMMITTEE February 28, 2014
Senate Bill 237
AN ACT PROHIBITING THE DISPOSAL OF FRACKING WASTE IN
CONNECTICUT

Thank you for the opportunity to testify.

I fully support this bill. Disposal of fracking wastes, which contain toxics and radioactive substances, should not be allowed in Connecticut under any circumstances whatsoever. Fracking wastes are a serious health hazard. If disposed of in Connecticut such wastes will contaminate our water supplies. In the future Connecticut will need all its uncontaminated water supplies. Just look at the situation where the University of Connecticut's growth is being affected by inadequate water supplies.

Yours truly,

Charles W. Morgan
