

Please vote for SB 237 to ban the fracking waste water disposal proposal for CT.  
We should be tightening our water and watershed and aquifer protection regulations--not  
worsening the situation.  
Who would have believed that the pollution of CT's waterways--after improving steadily for  
decades--is now worsening again?  
Smart, lucid legislators will vote for this bill--and for the future of CT's environment.  
The stakes are very high. Don't give in the expediency or lobbying or the thought of money  
now, worse pollution later.

Thank you,

Julie Bailey, New Milford CT
