Testimony S.B. 316 - AN ACT REQUIRING THE LABELING OF FOOD PRODUCTS
THAT ARE PACKAGED IN MATERIALS THAT CONTAIN BISPHENOL-A

Dear Environment Committee:

I strongly support S.B.316. Labeling food products that are packaged in materials that contain Bisphenol - A.

S.B. 316 is long overdue. When I first read about Bisphenol - A and the link to cancer I became very concerned, especially since there was no way to know what packaging materials contained it. The many reports indicating a link to cancer from exposure to Bisphenol - A, and the consumer having ' no way to avoid it ' was also a concern.

Labeling of food products that are packaged in materials that contain Bisphenol - A would allow consumers to avoid exposure to Bisphenol - A and protect their health.
