

Dear Committee members,

Please support Bills 5409 and 5410. Fracking liquid must be considered a hazardous waste, and as such, should be controlled so that there is no chance for it to contaminate Connecticut soils, waters or streams. Clean water is a vital resource for our citizens. We must not take it for granted. We read daily about the adverse impacts of impaired water supplies on the lives of ordinary folks here in our country and elsewhere in the world, and it becomes very clear that one of Connecticut's best attractions is its outstanding water sources and dependable supply of clean water.

Thank you.
