

When the income tax was initiated in New Haven, our state made a commitment to refund 77% of what we lose in taxes to non-profits.

Each year that percentage goes down until now it is less than ½ of what it should be.

The state has a huge budget of over \$20 billion dollars. You tax over 361 entities. You have intruded into and regulated every detail of our lives and yet you have refused to give us what you promised.

How can you give UI 100 million dollars to the out-of-state company (LEWIS) to come in and add to our global warming problem and destroy our state by clear cutting trees and refuse to give New Haven what you promised to give?

Please be men and women of integrity and do the right thing! Give New Haven our PILOT funds.
