

SB 259

I was totally shocked to read about this bill even being considered as real.

I have raised 11 foster children and have seen how drugs destroy the life of children exposed to them beyond the current 1500 foot no drug zones. I cannot believe anyone with any knowledge, I am assuming the sponsors of this bill have seen the destruction to individuals and their family, would consider allowing drugs any closer to schools. Perhaps they dropped a zero and actually wanted to say 2,000 feet.

I urge you to consider this bill as lacking merit and common sense and send it packing, never to be heard from again.
