

Bill 259 PH 3/12/14

Dear Sir or Madam,

It has come to our attention that this bill rewrites drug free school zone distances as written and amends the prior distance of 1,500 feet to 200 feet.

Please be advised this is ill-advised and unacceptable.

I, my wife, and especially my 6 1/2 year old daughter do not understand why anyone would wish to make us less safe. I am forced to tell my daughter those making this decision either do not have children and therefore cannot relate or that those making this decision do not care for families and/or a child's well being or a combination of both. That will be your legacy if this is allowed to move forward.

For the sake of our community and our families, we urge you to keep the verbiage of the law as is with no changes.

Concerned,

Craig and Margie Silverman
Danbury, Connecticut
