

Bill 259 PH 3/12/14

Gentlemen;

Adding weight to the mail in OPPOSITION to reducing the drug free zone to 200 ft.

Personally, I can't think of any logical reason why anyone would consider increasing risk by allowing irresponsible and dangerous people to get closer to our children, or anyone else for that matter. The reduction in distance not only enables easier access to dangerous drugs by children, but also everything else that accompanies the drug-dealing world. It is an environment fraught with people who are unstable and have no concern for human life, weapons, human trafficking and random violence.
