

Bill 259 PH 3-12-14

What has me scratching my head is that law in general. Its just a ridiculous law. The old image of the sterotypical drug dealer hanging around the school yard is antiquated and just doesn't really exist. I think the CT CGA REPs. should spend more of their time and our money looking at laws on the books that don't really make sense and don't apply to society anymore and start getting rid of them, instead of adding more laws to the books. LESS GOV'T interference in our lives is what we need.
