

Senate Bill 259: An Act Concerning the Recommendations of the Connecticut Sentencing Commission Regarding the Enhanced Penalty for the Sale or Possession of Drugs Near Schools, Day Care Centers, and Public Housing Projects.

Dear Judiciary Committee;

I feel that our state has always had our best interest in mind however the end result is not what was intended. When you bring our children in as a centerpiece as in Newtown or after school programs, we want what is best for our children . Though in this case you are putting the children not as the prime element of safety but a factor of risk. You are now putting drug dealers ahead of our children. Some dealers are non violent offenders but there are also some that carry guns and disregard human life. Please consider what is at hand here...THE SAFETY OF OUR CHILDREN.

Be smart and do what is best for our children and society.

Sincerely Yours,

Randall Muska
