I support a raise in the minimum wage.

I'm a 67-year old retired gov't worker on a pension. I spent most of last year working for \$8.45/hr at Walmart. I've since found a better-paying job. But most of the people I left behind at Walmart are working two jobs and/or receiving gov't assistance to get by.

Most of the 99% in this country are in trouble or running on an economic treadmill and not able to get ahead. It is time to make some changes.
