

Hi,

I know it's late but just a few comments:

I think the MDC charges are ludicrous. My bill has gone from \$8.80 in the late seventies to over \$160.00. That increase is over 2000 (yes, thousand) times what it was. Nothing else in this economy has risen like that.

There are non-member surcharges, Glastonbury surcharges and other charges which are unfairly being made to us, yet we have no say, no representation in any process.

There seems to be no accountability for MDC management on where money is being spent, including salaries. No transparency.

Something needs to be done, not just reducing charges that will extend for years. An overhaul of this utility is required.

That's all I have time for now.
